STATIC SECURITY GUARD SERVICE

Your Trusted Partner in Property Protection

Static Security Guarding is a powerful and reliable solution to deter property crime and safeguard your valuable assets. At Alertline Security, our Static Guarding services transcend the traditional image of a stationary night watchman. We provide comprehensive, professional, and proactive security solutions tailored to meet the specific needs of your business.

KEY FEATURES OF OUR STATIC GUARDING SERVICES

Advanced Security Measures:

- ✓ Static Guards trained to leverage technology and observational skills for maximum protection. Around-the-clock surveillance to ensure the safety of your premises and personnel.

Flexible and Adaptable Services:

- ✓ Reception duties, CCTV monitoring, gate operation, access control tailored to your requirements. Versatile roles that integrate seamlessly into your business operations.

Highly Trained and Licensed Personnel:

- ✓ All guards are PSA licensed and certified professionals. Courteous, courageous, and committed to providing top-tier security services.

Customised Security Functions:

- ✓ Gate operation and access management.
Identity verification and vehicle inspections.
Anti-theft and anti-sabotage measures.
Protection of vital installations, offices, and equipment.
Traffic control, parking management, and IT infrastructure security.

BENEFITS OF CHOOSING ALERTLINE SECURITY'S STATIC SECURITY GUARD SERVICE

Enhanced Business Operations:

Static Guards not only protect but contribute to a safe and secure environment, fostering business growth and continuity.

Client Confidence:

Professionalism and diligence instils confidence, making us a trusted security provider across Ireland.

Comprehensive Asset Protection:

Guards are equipped to handle diverse security challenges, ensuring your premises, staff, and assets are protected 24/7.

GUARD DOG SERVICES

Unmatched Protection with Highly Trained Guard Dogs

Alertline security specialises in providing expertly trained guard dogs for personal, family, and property security. With an emphasis on unmatched obedience, control, and tactical responsiveness, these dogs are tailored to meet the specific safety needs of each client.

Custom-Matched Dogs for Your Needs

Alertline Security takes pride in pairing each dog with a client based on lifestyle, security requirements, and personal preferences. The customisation ensures a seamless integration of the protection dog into your daily life.

Unparalleled Training and Expertise

Each dog undergoes rigorous training designed to prepare them for real-world security scenarios. This includes:

- **Personal Protection:** Defence against surprise attacks, mugging attempts, or threats while walking, driving, or at home.
- **Property Security:** Guarding homes, estates, or businesses with alertness and diligence.
- **Car Defence:** Specialised response training for protecting you and your vehicle.
- **Multiple Opponent Defence:** Capability to manage and neutralize threats from more than one assailant.

Features of Guard Dogs

Strong Bite Work: Dogs trained to respond decisively to threats while maintaining full control.

Mental Toughness: The ability to remain calm and act reliably under pressure.

Socialisation and Obedience: These dogs are not only protectors but also companions, ensuring a balance between security and family integration.

APPLICATIONS OF GUARD DOGS

- Family protection and home security.
- Business and estate safeguarding.
- High-risk individuals requiring advanced personal security measures.

GPS PLANT TRACKING

Monitor and protect your machinery and site equipment

Alertline GPS offers advanced tracking solutions designed to monitor and protect your machinery and site equipment across Ireland.

Key Features

- **Real-Time Tracking:** Monitor your machinery's location with live updates every three minutes, accessible via a free mobile app or web portal.

- **Geofencing Alerts:** Set virtual boundaries around specific areas; receive instant notifications if your equipment moves beyond these predefined zones.
- **Over-Speed Notifications:** Define speed limits for your machinery; get alerted if these thresholds are exceeded, promoting safer operation.
- **Route History Playback:** Review detailed travel history, including routes taken, stop locations, and durations, enhancing operational insights.

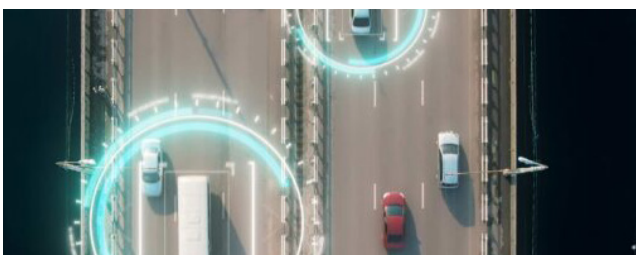

Product Specifications:

- **Compact Design:** A robust built-in magnet for easy and secure attachment to any metal surface.
- **Power Options:** Equipped with a lithium-ion battery; includes a charger and voltage reducer for hardwiring into your machinery's power system.

Benefits:

- **Enhanced Security:** Deter theft and unauthorised use by always knowing your equipment's location.
- **Operational Efficiency:** Optimise machinery utilisation and maintenance scheduling through detailed tracking data.
- **User-Friendly Interface:** Access tracking information effortlessly via the intuitive mobile app or desktop portal.

VEHICLE TRACKING

This GPS Tracker ensures you will always know where your vehicle is at all times – day or night.

We have live tracking on our own GPS Platform and can also provide monitoring which will alert us if there is an alarm activation within in seconds, we will be able to contact the relevant person to clarify if it is a real activation or a false alarm. There are standard protocols in place for these Units, but we can also cater for any special requirements.

Installation:

- **Battery-Powered Use:** Conceal the tracker within your machinery where it can receive a satellite signal; the strong magnet ensures secure placement.
- **Hardwired Installation:** Utilise the included voltage reducer to connect the tracker directly to your machinery's power supply for continuous operation.

CCTV MONITORING

CCTV (Close Circuit Television) is vital to ensure that your property is always monitored and secure. It also helps to prevent crimes from occurring, an effective deterrent to potential intruders. We all want to be able to protect ourselves, our properties, and possessions.

Our highly trained operators are available 24 hours a day – 7 days a week – 365 days a year, to respond to your alarm activations, check your footage and guarantee your property is safe at all times. Our state-of-the-art technology allows us to monitor the property and will alert the appropriate Emergency Services or Individuals should there be any suspicious activity.

Our CCTV Security Monitoring is a cost-effective long-term solution for all your monitoring needs.

INTRUDER ALARM MONITORING

We monitor both Commercial and Domestic alarms – Intruder, Fire and Panic activations. When your alarm is activated be safe in the knowledge that our highly trained operators will be in contact with you within seconds and if we cannot get hold of you immediately, we will then proceed to your approved Key-Holders that you have supplied. We will also contact An Garda Síochána / Police for any Verified Alarms which have been activated. An Garda Síochána / Police will always respond to personal attack alarm activations, these are alarms activated intentionally by a person who is in fear of criminal attack, on himself /herself or their property. As and from 31st January 2008 the policy of An Garda

Síochána will be to respond to verified alarm activation only. A verified alarm is one that is verified by the activation of a secondary detection device as a sequential verified alarm, or by visual or audible inspection (including remote camera or microphone). All Commercial Alarms must have verification technology installed by the 31st of January 2008. An Garda Síochána / Police will not respond to non-verified Commercial Alarms after that date.

SENIOR CARE – LOST PERSON TRACKING

Senior Care Alarms can be used for any situation at home for when you need help and are unable to get to a telephone. They are the most effective ways to keep you or your loved ones safe. These alarms are used by thousands of people across Ireland and the UK every year. They can be worn on your wrist or around your neck. We all want our loved ones to be safe and this unit is ideal for those who want to live independently but also want to be secure in the knowledge that if needed there is a unit that can locate them in a matter of seconds and talk to them using a 2-way speaker. Our highly trained operators can talk through any situation with the person in need and can also get assistance should they need it. We provide live tracking on our own GPS platform.

EV07 UNIT – PERSONAL ALARM

- This Personal Alarm is a clever device that allows the wearer to access help at any time or place.
- SOS Alarm button activation – Voice prompt when alarm is triggered.
- Two-Way calling with call recording.
- GPS outdoor tracking and BLE/Wi-Fi indoor tracking.

Docking Station provides quick charging – when the unit has a low battery a signal is sent to the central monitoring station. Always have the device on you.

LONE WORKER & MAN DOWN DEVICES

Being a lone worker in a high-risk environment can be the reality for most it is not just those working in remote countryside's, in reality it can be hospital staff, construction workers or anyone faced with violent or intimidating situations (verbal and physical abuse). It is so important that in the workplace there are safety

best practices in place. Lone worker devices protect your team, they are connected and monitored and will raise an alarm automatically or manually according to the situation. Being a lone worker in a high-risk environment can be the reality for most it is not just those working in remote countryside's, in reality it can be hospital staff, construction workers or anyone faced with violent or intimidating situations (verbal and physical abuse). It is so important that in the workplace there are safety best practices in place. Lone worker devices protect your team, they are connected and monitored and will raise an alarm automatically or manually according to the situation.

LONE WORKER SOLUTIONS – SOS MAN DOWN – GPS LOCATOR – TWO-WAY AUDIO

- Unit, docking station charger and lanyard is supplied.
- All customer information is displayed on screen within the ARC system in our Monitoring Station as alarm protocol.
- SOS Unit calls are recorded they can record both sides of conversation.
- Once the SOS button is pressed it will notify our operators immediately.
- GPS location is displayed after SOS is pressed.
- This unit is splash-proof and when the battery level reaches 20% the unit will send a low battery notification to the ARC / Monitoring Station.

MAN DOWN SOS BUTTON

The most advanced Satellite GPS SOS man down GPS/GPRS/SMS/GSM device on the market three Meter location.

ALERTLINE ARTIFICIAL INTELLIGENCE ANTI-THEFT SOFTWARE

Transform your business security and operations with Alertline's cutting-edge Artificial Intelligence surveillance system. Our technology works alongside your current CCTV setup, using advanced algorithms to detect suspicious activities such as shoplifting, providing instant alerts to store personnel for rapid response.
